

# IMPLEMENT

Support institutions to become  
real LLL Universities

euicen

*The objectives of IMPLEMENT are to disseminate and actively exploit the highly praised results of the BeFlex Plus project*

How can universities fulfil their role as "important social actors contributing to the better integration of adult learners, in particular through the recognition of informal and non-formal learning?  
How could universities be supported to invest in services for learners and communicate the results of their cooperative activities?  
How can they become truly LLL universities?

The training materials explore five topics:

1. Exploring Diversity in ULLL
2. Curriculum in partnership
3. Implementing institutional change in ULLL
4. Recognition of prior learning
5. Regional collaboration and partnership in ULLL

IMPLEMENT will add value to these materials by applied to national needs, using them in various training settings at institutional, national and transnational levels.

In addition, the project will develop an on-line platform to provide a sustainable and dynamic solution for the longer term, exploiting the rich learning resources complemented by best practice examples in different Higher Education Institutions (HEIs) in Europe.
